

SOMAY KOUSIS

Agentic AI Systems · Memory Architecture · AI Products · Startup Engineering
Faridabad, IN | +91 85958 36067 | somaykaush@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

CS undergraduate at ABV-IIITM Gwalior building production-grade agentic AI systems, memory architectures, and human-centered software. Focused on the intersection of intelligence, memory, and interfaces — designing systems where context persists and reasoning compounds. Current focus: LangGraph orchestration, RAG pipelines, MCP integrations, FastAPI backends, and AI product engineering.

EDUCATION

ABV-IIITM, Gwalior · B.Tech, Computer Science and Engineering · 3rd Year

Aug 2024 – May 2028

EXPERIENCE

Something · Co-Founder & Founding Engineer — Product, AI & Platform

Oct 2025 – Present

- Architected a founder-to-founder and founder-to-investor collaboration platform with structured discovery, preference-based matching, and AI-assisted recommendation logic across entrepreneur and investor profiles.
- Owned end-to-end product architecture — onboarding flows, matching algorithms, role-aware dashboards; translated ambiguous early-stage networking problems into scalable, usable systems.
- Stack: Next.js, TypeScript, TailwindCSS, Supabase, Vercel — github.com/Somay-kousis/Something

SteelCareer · Full-Stack Developer

Jan 2026 – Mar 2026

- Built a multi-role recruitment platform (seekers, providers, admins) using Next.js App Router, Supabase, and role-based auth; delivered job pipelines, approval workflows, interview scheduling, and analytics dashboards.
- Designed DB schemas, auth flows, and a modular component system in collaboration with stakeholders. Live: steel-career-41514p5or-somaykaush-6383s-projects.vercel.app

PROJECTS

Co-Founder Memory — Agentic AI Memory System github.com/Somay-kousis/Co-Founder-Memory

- Built a persistent personal AI co-founder using LangGraph — memory extraction pipelines, semantic consolidation, and reflection workflows that evolve the agent's understanding across long-horizon interactions.
- Layered memory architecture: episodic capture → semantic consolidation → RAG retrieval; multi-step agentic reasoning with tool calling and planning loops — the system advises and reflects, not just retrieves.
- Stack: LangGraph, LangChain, RAG, Vector Databases, Embeddings, FastAPI, Ollama

Oeuvre — Conversational AI Knowledge System portfolio-sable-psi-56.vercel.app

- Personal portfolio rebuilt as a RAG-powered knowledge layer — visitors query an AI interface that retrieves structured context via vector search and embeddings.
- Stack: Next.js, TypeScript, RAG, Vector Search, Embeddings, Vercel AI SDK

Customer Churn Prediction [Live Demo](#)

- End-to-end ML pipeline on 600K+ telecom records; XGBoost at ROC-AUC 0.9176. Features engineered across customer lifecycle, service adoption, payment patterns, and retention-risk signals.

RabbitHole — Agentic Research & Narrative Mapping [WIP] github.com/Somay-kousis/RabbitHole

- Multi-agent research system that maps competing narratives, surfaces non-obvious conceptual connections, and generates structured reports through iterative tool-calling and inference pipelines.

SKILLS

Agentic AI & Memory Systems: LangGraph, LangChain, RAG, MCP, Tool Calling, Context Engineering, Memory Architectures, Vector Databases, Embeddings, Ollama

Backend & Infrastructure: FastAPI, REST APIs, Supabase, PostgreSQL, Authentication, Database Design, Vercel

Machine Learning: PyTorch, Scikit-learn, XGBoost, CatBoost, Feature Engineering, Model Evaluation, EDA

Frontend & Product: Next.js, React, TypeScript, TailwindCSS, Product Design, UI/UX

Languages: Python, TypeScript, JavaScript, C++, SQL

ACHIEVEMENTS

Smart India Hackathon 2025 — Team Leader · 6th Place (National). Led a 6-member team through technical execution, product direction, and pitching at a government-level innovation challenge.

Hacksagon 2024 — 3rd Position. Recognised for product thinking, solution design, and implementation quality at an inter-college challenge.

Published Writer — CAMA Magazine. Published poetry and long-form writing on storytelling, observation, and human-centered themes.

LEADERSHIP & COMMUNITY

SGM Social Initiative (Executive) · **Make A Difference (MAD)** (Volunteer) · **Uthaan Journalism Club** (Member) — Free mathematics and English tutoring for underprivileged children; editorial writing and storytelling for institute journalism.
